Army nurse and American Red Cross Home Communication Service worker in an American military hospital in France which is supported by the American Red Cross. The Red Cross is now making a big drive to secure \$,000 additional graduate nurses for the Army Nurse Corps by October 1.

## Making a Little Sugar Go a Long Way

How much can you do with one pound of sugar? Do you know that by stretching with syrup and honey you can make it put up about five quarts of fruit in one way and another? Figure it out for yourself with these recipes.

**Canned Peaches.**  
2 pounds peaches (8 to 12)  
1 cup (2 ounces) sugar  
1/2 cup (6 ounces) syrup or honey  
2 cups water.

Select sound peaches and cover with boiling water for one or two minutes, or until the skin is easily removed. Then cover immediately with cold water to prevent the softening of the fruit. Peel, and halve the peaches, removing the stones. Place water, sugar and syrup on the stove and when boiling point is reached, add the peaches and cook slowly until tender. Pack carefully in sterilized jars, fill well with juice and seal. When cold, store in a dark cool place. This will fill one quart jar.

**Canned Plums.**  
2 pounds plums (16 to 24)  
1/2 cup (2 ounces) sugar  
1/2 cup (6 ounces) syrup or honey  
2 cups water.

Select sound plums, stem and wash

carefully. Place sugar, syrup and water on stove and when the boiling point is reached add the plums. Cook slowly until fruit is done. Place in sterilized jars and seal carefully.

**Preserved Plums.**  
2 pounds plums (16 to 24)  
1/2 cup (2 ounces) sugar  
1/2 cup (6 ounces) syrup or honey  
1/2 to 1 cup water.

Heat syrup, sugar and water together until boiling point is reached. Add the plums which have been stemmed and washed, and if desired, they may be cut in halves and the stones removed. Cook slowly until the fruit is tender and place in sterilized jars and seal or cover with paraffin. Store in cool place.

**Peach Butter.**  
3 pounds peaches  
1/2 cup (2 ounces) sugar  
1/2 cup (6 ounces) syrup or honey  
1 cup water.

Prepare the peaches or other sweet fruit as for canning. Add water and cook until fruit is done. Press the fruit through a colander or sieve and add the sugar and syrup and other sweetener. Cook slowly stirring carefully until the mass is as thick as desired. Pour into sterilized jars and when cool, cover with paraffin.

## Dorothy Dix Talk

WHEN THE DOMESTIC GIRL LOSES OUT

By DOROTHY DIX, The World's Highest Paid Woman Writer

A young woman has propounded to me the riddle of the Sphinx. She wants to know why the sensible girl, who is fitted to make a good wife, so seldom has the chance to be one, while a silly little goose of a girl, who will be the ruin of the man she marries, can commit bigamy as often as she likes.

"Why do men pass over the domestic girl for the fluffly ruffles one?" she asks. "Men want wives who will be good housekeepers, who are practical and thrifty, and will know how to save their money. Why isn't they flock around girls who will make that kind of help meet, instead of the baby dolls, who don't know how to do anything but spend money and dress themselves up? They don't, you know. We sensible, practical, domestic girls seldom have a beau, or get a chance to marry, unless we are the second choice of some middle aged widower."

"Why isn't it as alluring to a man for a girl to know how to perform on the cook stove as it is for her to perform on the piano? Why isn't he just as much thrilled in holding a hand that has a few needle pricks on the fingers, as he is in holding one that some other woman has been paid to manicure?"

"Why, indeed? I wish that I could answer my correspondent's question, and tell her why a man is attracted to a girl by the very qualities that he deprecates in his wife, and why he marries a girl for one thing and blames her ever afterwards for being it, but I cannot explain this peculiarity of the masculine psychology. Nobody can. Least of all does the man himself, know why he picked out a hand painted parlor ornament, when what he wanted was a useful kitchen appliance. He simply does and for the rest of his life wonders why."

Of course the kind of a woman that a man falls in love with is a matter of personal taste, and there is no arguing about tastes. Still, one can suggest several reasons why the home-spun girl is not as alluring to the masculine fancy as the pink chiffon girl.

One of these reasons is that the practical, common sense kind of girl, generally overdoes the practical and common sense stuff. She lacks romance and sentiment, and after all these are the veil in which a woman must clothe herself before a man sees her as the lady love of his dreams, instead of just one more female inhabitant of the world.

The very practicality which makes a woman a paragon of a wife is her undoing as a lady love, because it keeps her from practicing the little wiles with which the expert feminine fisher of men baits her hook for the catch. The practical woman cannot go and go and gurgel over a man, because she would feel like a fool if she did it, yet men like to be literally and metaphorically chuckled under the chin and fussed over, as if they were babies. Neither can the practical woman talk to a man on any but sensible subjects, and how can a discussion of the steel dividend, or the best way to Hooverize lead up to popping the question?

Love making can only flourish in a congenial atmosphere, and the practical woman does not know how to produce it. Neither has any man got the requisite nerve to up and ask a woman to marry him in cold blood. He has to be gently and insidiously worked up to the proper temperature and the common sense woman hasn't that kind of sense in her repertoire. Nor does the practical woman know how to jolly a man along. Instead of

telling him that he is the wonder of the ages, she candidly calls his attention to his faults or shortcomings, and points out his mistakes to him, and which no woman can make a more fatal move if she desires to be admired of man.

Another reason that the practical, common sense girl does not attract men is because she stands too sturdily on her own two little feet, and when a woman shows that she can stand alone, the masculine tendency is to let her do it. Helplessness in a woman is the one quality that appeals most to a man. That is why the floppy dish rag woman can marry early, and as often as necessity demands.

A man always pictures himself as a knight rescuing a distressed damsel. It appeals to his chivalry to feel that he is protecting and supporting a clinging little thing. It tickles his vanity and makes him feel about seven feet high, and as wise as Solomon for a girl to ask him what he thinks about everything, and defer to his judgment, and that is why the less sense a woman has the better she can marry, and the less useful she is to her husband, the more he does for her. And it is also where the practical, common sense girl loses out.

But perhaps the real reason why men are more attracted to the silly, frivolous butterfly girl, who spends her time in adorning herself, instead of to the practical, common sense girl, who devotes herself to a useful domestic occupation, is to be explained only on the theory that we are all allured more by the luxuries of life than by the necessities. We know that roast beef and potatoes are more wholesome than lobster newburg, but it is the lobster that our palate craves.

It is the airs and graces, the daintiness and the perfume, the very fact that she is so different from the hard, practical, work-a-day world that makes a man fall in love with a girl who is a lily of the field, who toils not, neither does she spin, and who hasn't the faintest idea of how to toil, or spin, or be a good wife.

And he marries her, and is sorry ever after, as we all are when we forsake roast beef and potatoes and eat the things that give us chronic dyspepsia.

But it explains why the domestic girl so seldom gets a chance to practice domesticity in her own home.

## ASSIGNMENTS FROM ARMY SCHOOL DRAFTEES

A. T. Barrett of the local radio school has been instructed to give publicity to the following circular letter from the federal board of vocational education:

1. Men drafted and sent to cantonments are placed in depot brigades or casual detachments. While there, they are given military drill, their records are classified, and certain medical treatment is given. This assignment lasts from two to six weeks. Men are then given a permanent assignment. Men sent to army schools under the committee on education and special training are given permanent assignments from these schools.

2. In every branch of the army many technically trained men are needed. Thus the infantry needs machinists, motor and gas engine experts, radio men, etc.; the field artillery needs these and in addition blacksmiths; the signal corps needs all of the above and in addition instrument repair men and others. It is not possible to train an over-supply.

3. In each branch of the service there must be trained men in reserve to replace the men actually doing the work. Thus, many men properly assigned are not yet working at their trade. Complaints from these men cause unnecessary dissatisfaction.

4. Men should be sure to use the Federal Board cards as directed so that the officers may be informed of their training. If the cards are properly used, most men will be assigned in accordance with their training.

5. Much has been done by men who complained to their friends about their "misplacement" before they were really placed at all. All men should know the facts mentioned in these paragraphs, should follow directions and wait assignment instead of complaining prematurely. They should also realize that in assigning 1,000,000 men, some mistakes will be made.

6. Men inducted into special services are sure of placement in that branch. Voluntary induction may be stopped at any time by order of the provost marshal general, however.

## Duke Arrives in Chicago to Visit War Exposition

CHICAGO, Sept. 9.—The Duke of Devonshire, governor-general of Canada, accompanied by members of his staff and Newton Wesley Rowell, president of the privy council of Canada, arrived in Chicago today to visit the war exposition. Tomorrow will be Canadian day at the exposition and the duke and his party will be the city's guest of honor.

## AMERICAN MISSION ARRIVES IN ALGIERS

ALGIERS, Sunday, Sept. 8.—The American mission which has been designated to help in the development of agricultural production of Algeria arrived today.

According to private information, the mission desires to obtain a concession to more than 4,000,000 acres for cultivation by American methods and with American implements. The governor general entertained the mission at luncheon today.

**LOAN TO TURKEY.**  
AMSTERDAM, Sept. 9.—The Turkish minister of finance has announced that Turkey has concluded a fresh loan from the German government for 45,000,000 Turkish pounds, the Berlin Vossische Zeitung states.

## OFFENSIVE IS SLOWING DOWN

British Forces Making Slow Progress in Direction of Cambrai and St. Quentin.

(By the Associated Press)

As the Allied armies draw near to Cambrai, St. Quentin and the natural defensive positions of the Germans in the St. Gobain forest, the offensive is losing momentum.

Slow progress continues to be made by British forces in the direction of Cambrai and St. Quentin, but if the operations of the French armies are successful in encircling the St. Gobain massif, the German retreat must be quick and with greater rapidity.

The British are within six miles of St. Quentin at Villeneuve and have captured Roisel and St. Emile.

Along the line between Cambrai and St. Quentin the British advance has carried them into their old positions, from which they were driven by the Germans last March.

Strong counter-attacks against the French near Laffaux and north of Celles-sur-Aisne seem to bear out the belief that the Germans will not give up St. Gobain without a struggle. In addition to the protection it affords Laon, the St. Gobain positions if captured would weaken the entire German line eastward toward Rheims. Northwest of St. Gobain the French have taken Monnesis and Tergnier, and are threatening La Fere. On the edge of the forest the French have penetrated the outskirts of Servalis.

Between the Vesle and the Aisne ground has been gained by the French and American forces.

## MORE WESTERN MEN GRADUATE

Large Number of Additional Names in Camp Zachary Taylor List of Officers.

WASHINGTON, Sept. 9.—Additional names of candidates graduating from the field artillery central training officers' school at Camp Zachary Taylor and recommended as eligible for appointment as second lieutenants of field artillery, United States army, were made public today as follows:

Mains, Seward Lincoln Jr., private, Crete, Neb.

Mallory, Youngberger, sergeant, Paris, Texas.

Malone, Bailey Carlisle, corporal, Ferris, Texas.

Mahore, Roy Eric, private, 3649 Sunset Place, Fremont, Seattle, Wash.

Mannes, Austin, corporal, Utah apartments, Salt Lake City, Utah.

Marcelus, Edwin Winifred, private, Ainsworth, Neb.

Marcelus, Edward Winifred, private, Ainsworth, Neb.

Martin, William Pitt, sergeant-major, 4101-Bowser street, Dallas, Tex.

Mattel, Albert Chester, private, Los Olivos, Cal.

Mattox, John G., sergeant, Scotts Bluff, Neb.

Maurice, Charles MacLeod, sergeant, Great Falls, Mont.

Mays, Harold Randels, corporal, 749 Elizabeth street, Salt Lake City, Utah.

Meade, Leslie Verne, sergeant-major, 1721 C. street, Lincoln, Neb.

Meissner, Richard Constantine, private, R. F. D. No. 1, Blair, Neb.

Menzies, John Wilfred, sergeant, 1010 Broadway, San Diego, Cal.

Menzies, Ned, corporal, 1010 Broadway, San Diego, Cal.

Merriam, Ralph Truman, corporal, 65 North Madison avenue, Pasadena, Cal.

Merritt, Robert Wendell, private,

1450 Second street, Denver.

Mesner, Herbert Glendon, sergeant-major, Trinidad, Colo.

Mulvry, Frank Anthony, sergeant, Price, Utah.

Murphy, Clarence Lewis, sergeant, 2723 Thirty-second avenue south, Seattle, Wash.

Murray, Frank Thomas, sergeant, 811 North First street, Alhambra, Cal.

Murray, Edward Surret, private, Casper, Wyo.

Murray, Harry Albert, sergeant, 2523 Caldwell street, Omaha, Neb.

Nathan, William Max, sergeant-major, 1905 Belle avenue, Houston, Tex.

Lawrence, Guy Thomas, sergeant, Sixth and Jay streets, Hoquiam, Wash.

Niese, Richard Davis, sergeant, Corsicana, Tex.

Ness, Will Arthur, private, Arleta, Wash.

Nettelton, Harry Ira, private, La Porte, Colo.

Newbury, Ransom, sergeant, Klamath Falls, Ore.

Newhouse, George Thaxton, sergeant, 111 West Fifth street, Long Beach, Cal.

Nikelson, Roy Jacob, sergeant, 308 Yates avenue, San Francisco.

Nichel, Isaac Lawrence, musician, Jerome, Ariz.

Noble, Daniel Boehn, private, Whitehall, Mont.

Norton, Warren Dexter, private, 221 Grant street, Berkeley, Cal.

Nyman, Fritz, private, 828 East Fifth street, Salt Lake City, Utah.

Oasis, Alfred, private, 2117 North Sixty-third street, Seattle, Wash.

Perryman, Glenn, sergeant, Peridco, Tex.

## RECORD AMOUNT OF COTTON GINNED

WASHINGTON, Sept. 9.—More cotton was ginned in America this year prior to September 1 than in any previous year. The census bureau announced today that 1,039,620 bales had been ginned.

The largest quantity ginned heretofore up to September 1 was 850,663 bales in 1916 when 7.5 per cent of the crop was ginned to that date.

The heavy ginnings are ascribed to hot weather in the western part of the cotton belt. Much cotton opened prematurely and the picking was done early. There was a considerable increase in southern Texas acreage and the crop there matured early.

REAL ESTATE TRANSFERS.

Joseph R. Jeppson and wife to Nellie Fletcher, part of lot 6, block 12, plat C. Ogdenville survey; consideration \$1. Warranty deed.

KING FERDINAND RETURNS.

AMSTERDAM, Sept. 9.—King Ferdinand of Bulgaria, returned to Bulgaria on Sunday, according to a dispatch received here today from the Bulgarian capital.

If a man can't be bought you can usually land him with flattery.

There is nothing in a name. No river thief has ever stolen a river.

Too many business women are interested only in the business of their neighbors.

Greet your many friends and renew old acquaintances at the
